

# Decorative glass

## What is decorative glass?

Decorative glass is a type of finished glass with a textured surface and a variety of available patterns, colours, and levels of translucency, making it an exciting material with a wide range of applications. We offer a rich selection of glass tints from clear decorative glass to darker shades.

## Where can I use decorative glass?

Decorative glass is mainly used in interiors, for example in partition doors, kitchen cabinet doors, and other glass parts of furniture.

## Technical details

Decorative glass generally has a thickness of 4 mm, but some varieties go up to 10 mm. Most decorative glass can also be toughened and laminated, although this depends on the depth of the pattern of the glass.
